

MAYUR DOKRAS

SOFTWARE ENGINEER | BACKEND | JAVA | PYTHON | C++ | CLOUD

+44 7776773819 | mayurdokras@gmail.com |  LinkedIn |  GitHub |  Portfolio

PROFESSIONAL SUMMARY

Software Engineer with **4+ years of experience** across backend development, production systems, banking, FinTech, telecommunications and automation. Hands-on with **Java, Python, C/C++, Spring Boot, REST APIs, microservices, SQL, Linux and CI/CD**, with experience building secure integrations and supporting production-critical systems. Experienced in technical ownership, automated testing, code review, debugging and root-cause analysis, with cloud and **AI/LLM project experience including RAG and prompt engineering**.

SKILLS

Java | Python | C/C++ | SQL | Spring Boot | FastAPI | REST APIs | Microservices | API Integration | OAuth2 | HTTPS/TLS | PostgreSQL | MySQL | MongoDB | Oracle PL/SQL | Firebase | AWS | GCP | Linux | Git/GitHub | Jenkins | CI/CD | Terraform (Learning) | JavaScript | TypeScript | React | Kotlin | Flutter | Dart | OOP | Data Structures | Code Review | TDD | Unit Testing | GDB | Wireshark | Postman | Root Cause Analysis | Production Troubleshooting | Agile/Scrum | Generative AI | LLMs | RAG | Prompt Engineering | OpenAI API

WORK EXPERIENCE

Backend Developer – Part-Time | Malvox, University of Southampton

Feb 2025 – Jul 2025

Southampton, UK | Completed alongside MSc Software Engineering

- **Backend & API development:** Built secure backend workflows for a UK cybersecurity platform, owning API-to-database functionality across application, API and data layers; integrated **3 UK Government APIs** using Python, SQL and REST APIs.
- **Security & data:** Implemented OAuth2, HTTPS/TLS, token-based session management and AES-256 encryption; designed relational data models and optimized secure queries for reliable, low-latency processing.
- **Testing & troubleshooting:** Investigated API, authentication, database and integration issues; validated error paths and data handling for real-time threat-monitoring workflows while delivering through Agile sprints using Git.

Associate II – Software Engineer | Capgemini Engineering

Nov 2021 – Nov 2024

India | Global Client Delivery supporting UK, US & EMEA clients | Banking, FinTech & Telecom

Selected clients: British Telecom | Verizon | Orange | AT&T | HSBC | Kingdom Bank | Axis Bank

- **Production software engineering:** Developed and maintained production-critical **GPON software and real-time CCM/CFM protocol components** using C/C++, Python and Linux across large-scale international client environments.
- **Backend & automation:** Built **Python automation utilities and test frameworks** for operational workflows, debugging and validation; supported backend APIs, enterprise data flows, data models and cross-platform integrations.
- **CI/CD & software quality:** Integrated development and testing workflows with Git and Jenkins CI/CD; performed peer code reviews and applied TDD, unit testing and pair programming to improve software quality and release reliability.
- **Production troubleshooting:** Performed low-level debugging, packet analysis and root-cause investigations using **GDB and Wireshark**; resolved **40+ production defects** and contributed to a **25% reduction in MTTR**.
- **Engineering delivery:** Delivered **7+ production features** through requirements analysis, implementation, testing and release support across concurrent banking, FinTech, telecom and automation initiatives.
- **Technical ownership:** Owned assigned workstreams and coordinated **4–5 engineers**, working with UK/US/EMEA stakeholders on requirements, technical estimates, sprint planning, code reviews, technical blockers and production releases.

Freelance Software & Mobile Developer | FinTech Startup Client

Feb 2021 – Oct 2021

Upwork Freelance Contract | India – Remote | Australian Client

- **Full-stack FinTech development:** Designed and delivered a cross-platform financial application using Flutter, Firebase and backend-connected data workflows, owning development from application logic through API integration and delivery.
- **Payments & API integration:** Integrated PayPal and Razorpay APIs for multi-currency payment processing with transaction validation, logging and real-time financial tracking.
- **Backend, data & security:** Worked with PostgreSQL and Firebase for application data, authentication, cloud storage and real-time synchronisation while implementing secure data-handling and transaction workflows.

PROJECTS

- **AI Platform / Chatbot (In Progress):** Building a Python-based AI application using **LLMs, RAG, prompt engineering and OpenAI APIs**, integrating retrieval, backend workflows and cloud services with a React/Vue-based conversational interface.
- **MSc Project – Link2Feed:** Developed a full-stack Android application integrating **UK Government APIs and Firebase**, handling secure API integration, structured data flows and scalable application workflows.
- **Bachelor's Dissertation – Web Application:** Developed a JavaScript, PHP and SQL-based web application with relational data management and custom re-ranking logic.
- **Diploma Project – Steganography System:** Developed a Java-based LSB steganography system for securely hiding and retrieving information within digital media.

EDUCATION

- **MSc Software Engineering** | University of Southampton, UK | 2024/26
- **Bachelor's in Information Technology** | AISSMS IOIT, India | 2018/20
- **Diploma in Information Technology** | RIT Polytechnic, India | 2015/17

MSc coverage: full-stack development, systems integration, UK Government API integration, Kotlin, React, MongoDB, Oracle PL/SQL, software testing, software security and binary analysis.
