

MAYUR DOKRAS

SOFTWARE ENGINEER | AUTOMATION | INTEGRATION | PYTHON | BACKEND

+44 7776773819 | mayurdokras@gmail.com |  LinkedIn |  GitHub |  Portfolio

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience across automation, backend development, systems integration and production software. Hands-on with Python, SQL, REST APIs, data flows, Jenkins CI/CD and Linux, with experience in **debugging, root cause analysis, automation tooling**, enterprise integrations and supporting production-critical services. Experienced in technical ownership, stakeholder collaboration, incident troubleshooting, root cause analysis and coordinating 4–5 engineers across UK, US and EMEA client environments.

SKILLS

Python | Automation | Systems Integration | REST APIs | API Integration | SQL | PostgreSQL | MySQL | Oracle PL/SQL | Data Modelling | Data Warehousing | ETL & Data Pipelines | Backend Architecture | Microservices | Event-Driven Architecture | Java | C/C++ | FastAPI | Spring Boot | OAuth2 | HTTPS/TLS | AWS | GCP | Linux | Git/GitHub | Jenkins | CI/CD | Terraform (Learning) | Production Troubleshooting | Root Cause Analysis | Incident Resolution | Performance Optimisation | Reliability Engineering | Unit Testing | TDD | Code Review | Agile/Scrum | Technical Leadership | Stakeholder Management | Snowflake | MongoDB | Firebase | GDB | Wireshark | Postman

WORK EXPERIENCE

Backend Developer – Part-Time Volunteer | Malvox, University of Southampton

Feb 2025 – Jul 2025

Southampton, UK | Completed alongside MSc Software Engineering

- **Integration & APIs:** Built secure backend workflows for a UK cybersecurity platform, owning API-to-database functionality across application, API and data layers; integrated **3 UK Government APIs** using Python, SQL and REST APIs.
- **Data & security:** Designed relational data models and secure data flows while implementing OAuth2, HTTPS/TLS, token-based session management and AES-256 encryption for reliable backend processing.
- **Production troubleshooting:** Investigated API, authentication, database and integration issues; validated error paths and data handling for real-time workflows while delivering through Agile sprints using Git and Slack.

Associate II – Software Engineer | Capgemini Engineering

Nov 2021 – Nov 2024

Global Client Delivery – UK, US & EMEA | Automation, Integration, Backend & Production Systems

Selected clients: British Telecom | Verizon | Orange | AT&T | HSBC | Kingdom Bank | Axis Bank

- **Automation engineering:** Built **5 Python automation tools** and test utilities to automate debugging, log analysis and operational workflows, integrating internal APIs and Jenkins CI/CD across production engineering environments.
- **Systems & integration:** Developed and supported production-critical software and integration workflows using Python, C/C++, Linux, APIs and enterprise data flows across international telecom, banking and FinTech environments.
- **Technical ownership:** Owned assigned workstreams and coordinated 4–5 engineers across features, defects and sprint commitments while remaining hands-on with development, debugging, code reviews, technical blockers and release support.
- **Production services:** Monitored and troubleshoot production software, investigated incidents and performed root-cause analysis using GDB, Wireshark and system logs, contributing to a **25% reduction in MTTR**.
- **Delivery & reliability:** Delivered 7+ production features and resolved 40+ production defects while improving reliability, maintainability and operational support across concurrent engineering projects.
- **Stakeholder collaboration:** Worked with UK/US/EMEA engineering and business stakeholders on requirements, technical estimates, sprint planning, implementation, releases and production support for complex multi-team initiatives.

Freelance Software & Mobile Developer | FinTech Startup Client

Feb 2021 – Oct 2021

Australia – Remote

- **Full-stack integration:** Designed and delivered a cross-platform FinTech application using Flutter and Firebase, owning frontend, backend, API integration and production delivery end-to-end.
- **Data & workflows:** Built backend-connected workflows for authentication, cloud data storage and real-time synchronization; integrated PayPal and Razorpay APIs for multi-currency payment processing.
- **Reliability & security:** Implemented transaction validation, secure logging and data-protection controls across payment and application workflows.

PROJECTS

Link2Feed (MSc): Full-stack application integrating UK Government APIs, Firebase and application data workflows with secure API integration and scalable data handling.

AI Platform (In Progress): Python-based platform integrating APIs, cloud services and AI workflows with backend architecture, RAG and automation components.

Undergraduate Web App: JavaScript, PHP and SQL application with relational data handling and custom ranking logic.

Diploma Steganography: Java-based LSB secure data-hiding system.

EDUCATION

- **MSc Software Engineering** | University of Southampton, UK | 2024/26
- **Bachelor's in Information Technology** | AISSMS IOIT, India | 2018/20
- **Diploma in Information Technology** | RIT Polytechnic, India | 2015/17

MSc coverage: full-stack development, systems integration, UK Government API integration, databases, data modelling, MongoDB, Oracle PL/SQL, software security and binary analysis.

CERTIFICATIONS

Data Warehousing (Snowflake) • Collaboration, Marketplace & Cost Estimation (Snowflake) • Cloud Computing (IBM) • AWS S3 (Coursera) • Claude Code in Action (Anthropic) • Agile Software Development (Coursera) • Dart Functions Framework (Google Cloud) • Java OOP (LinkedIn Learning)
